TABLE OF CONTENTS

	Page	Russ. page
1. Refractometric Analysis of Ternary Systems. B. V. Joffe and A. G. Morachevsky	1	3
2. X-Ray Spectrographic Determination of Hafnium in Zirconium Minerals and Concentrates. E. E. Vainshtein, I. D. Shevalevsky and I. F. Shtauberg	11	14
3. Quantitative Spectrographic Analysis of Hafnium in Zirconium. G. Kryuger, R. R. Shvangiradze and T. A. Mozgovaya	15	20
4. Colorimetric Determination of Vanadium by Means of a Catalytic Reaction. V. A. Nazarenko and E. A. Biryuk	21	28
5. Organic Coprecipitants. 2. Coprecipitation of Tungsten with Organic Coprecipitants. V. I. Kuznetsov, M. N. Obozhin and E. S. Palshin	25	32
6. Potentiometric Titration Using the Catalytic Decomposition of Hydrogen Peroxide on a Platinum Electrode. I. E. Flis	31	38
7. Potentiometric Determination of $Cr_2O_7^{2-}$ Ions and Strong Acids when Both Are Present Simultaneously. I. E. Flis and Zh. L. Verl	37	44
8. Functional Analytical Groups for Iron and Bismuth. N. M. Turkevich	41	47
9. Micro Determination of Carbon in Metals. P. A. Kryukov and E. V. Rengarten	45	51
10. Precipitation of Quadrivalent Vanadium with 5,7-Dibromo- and 5,7-Diiodo-8-hydroxyquinoline. I. P. Alimarin and V. G. Kryukov	49	56
11. Diphenylcarbazone as a Reagent for the Colorimetric Determination of Germanium. G. S. Desmuk	53	61
12. A Specific Reaction for Formaldehyde. G. Vanag and E. Vanag	55	63
13. Characteristic Chromatographic Reactions for Glucose and Acetone. F. M. Shemyakin and O. S. Lobakhina	57	65
Criticism		
14. R. Prshibil, "Complexones in Chemical Analysis", Czech. Acad. Sci. Press, Prague, 1953, pp. 167, Price 24 Crowns (Kcs.). Reviewed by R. P. Lastovsky	61	69
Chronicle		
15. The Conference on the Application of Complex Compounds in Analytical Chemistry held from October 25-27, 1954 at Ivanovo	63	71

March-April, 1955

TABLE OF CONTENTS

	Page	Russ. page
1. Spectrographic Determination of Hafnium and Zirconium. E. V. Gusyatskaya and A. K. Rusanov	67	75
2. Effect of the Structure of the Oxime Molecule on the Properties of its Compounds with Metal. V. M. Peshkova	77	86
3. Quantitative Characteristics which Determine the Possibility of Using Complex Compounds in Volumetric Analysis. K. B. Yatsimirsky	85	94
4. A Volumetric Method for the Determination of Cobalt with Dimethylglyoxime. A. K. Babko and M. V. Korotun	91	100
5. The Solubility Products of the Rubeanates of Copper, Nickel and Cobalt. D. P. Malyuga	97	107
6. High Frequency Titration. II. Changes in the Electrical Characteristics of Solutions During Titration. V. A. Zarinsky and D. I. Koshkin	101	111
7. Determination of Cesium as Cesium Bismuth Iodide. V. E. Plyushchev and V. G. Korshunov	107	119
8. Physico-Chemical Methods of Determining Antibiotics. II. The Anthron Method for the Quantitative Determination of Mannosidostreptomycin. E. M. Savitskaya, B. P. Bruns, A. A. Korobitskaya and V. D. Kartseva	113	124
9. New Complexones. R. P. Lastovsky, Yu. I. Vainshtein, N. M. Dyatlova, V. Ya. Temkina and N. D. Kolpakova	117	128
10. Luminol Indicator Paper for Hydrogen Peroxide Detection. A. A. Ponomarenko	121	132
Chronicle		
11. Valerian Levanovich Khukhiya	123	134
12. The Second Ukrainian Conference on Chemical Control in the Metallurgical and Metal Processing Industries, Convened to Celebrate the 300th Anniversary of the Union of the Ukraine with Russia, and Held at Dnepropetrovsk from June 5-8, 1954. Yu. I. Usatenko	125	135

TABLE OF CONTENTS

	Page	Russ. page
1. Complexones and their Significance in Analytical Chemistry. S. I. Sinyakova	129	139
2. Determination of the Main Components of Clay, Spectrographically. E. E. Vainshtein, T. V. Borovik-Romanov and V. V. Korolev	147	158
3. A Micro Method for the Determination of Primary Aromatic Amines by Potentiometric Titration with Sodium Nitrite. L. M. Litvenenko and A. P. Grekov	153	164
4. Acidimetric Determination of Phenols. E. T. Lippmaa	157	169
5. Polarographic Determination of Saccharin. M. B. Neiman	163	175
6. A Persulfate-Cobalt Volumetric Method of Determining Manganese in Ores and Rocks. D. N. Finkelshtein and I. B. Petropavlovskaya	169	180
7. The Use of (W_1 W_2)-Diagrams for X-Ray Spectrographic Analysis. E. E. Vainshtein and I. D. Shevaleevsky	173	184
Brief Communications		
8. A Specific Reaction for Vanadium. V. L. Zolotavin	177	189
9. Colorimetric Determination of the Quality of Azoribamin. V. M. Iosikova	179	191
Discussion		
10. Apropos Observations Made by K. Mitska and A. A. Vlcheck Re the Article "Diffusion of Electrolytes and The Polarographic Method". Ya. P. Gokhshtein	181	192
Chronicle

Cell, for quantitative infrared spectral analysis and an apparatus for measuring the thickness and the wedge of cells, 247.
Cesium, Coprecipitation with potassium picrate, 311.
—Determination as cesium bismuth iodide, 107
Chloramines, use in qualitative analysis, 375.
Chromatographic analysis, characteristic chromatographic reactions for glucose and acetone, 57.
Chromium, potentiometric determination of $Cr_2O^{=}$ ions and strong acids when both are present simultaneously, 37.
Clay, spectrographic method for the determination of the main components of, 147.
Coal, brown, rational analysis of the mineral components of, 367.
Cobalt, Colorimetric determination as the ethylxanthate complex, 283.
—Volumetric method for the determination of, with dimethylglyoxime, 91.
—Rubeanate, see rubeanates.
Colorimetric analysis. Chemico-analytical properties of xanthates. Colorimetric determination of cobalt as the ethylxanthate complex, 283.
—Colorimetric determination of the quality of azoribamin, 179.
—Colorimetric determination of vanadium by means of a catalytic reaction, 21.
—Derivatives of trihydroxyfluorone as reagents for tin and antimony, 273.
—Diphenylcarbazone as a reagent for the colorimetric determination of germanium, 53.
—Effect of the structure of the oxime molecule on the properties of its compounds with metals, 77.
—The analytical chemistry of rhenium, 215.
Complexometric analysis. Complexones and their significance in analytical chemistry, 129.
—Conference on the application of complex compounds in analytical chemistry, held from October 25-27, 1954, at Ivanovo, 63.
—Criticism of book "Complexones in chemical analysis", R. Prshibil, (1953), 61.
—Investigation of complex compounds of the uranyl ion which are of importance in analytical chemistry, 223.

—New complexones, 117.
—Quantitative characteristics which determine the possibility of using complex compounds in volumetric analysis, 85.
Conference, On the application of complex compounds in analytical chemistry, held from October 25-27, 1954 at Ivanovo, 63.
—Second Ukrainian, on chemical control in the metallurgical and metal processing industries. Convened to celebrate the 300th anniversary of the Union of the Ukraine with Russia, and held at Dnepropetrovsk from June 5-8, 1954, 125.
Copper. Method for determination of, based on catalytic effect on oxidation of thiosulfate by ferric iron, 329.
—Rubeanate, see rubeanates.

Diphenylcarbazone, see carbazone.

Electrode, obtained by the catalytic decomposition of hydrogen peroxide on platinum, use in potentiometric titration, 31.
Electrolytes, diffusion of, and the polarographic method, observations made by K. Mitska and A.A. Vlchek, 181.
Electrometric analysis, high frequency titration. Changes in the electrical characteristics of solutions during titration, 101.
Ethyl nitrate, polarographic determination in aqueous solution 293.
Ethyl nitrite, polarographic determination in aqueous solution, 293.

Fluorimetric analysis, fluorescent detection of thallium and mercury, 277.
Fluorine. Determination in organic compounds, containing chlorine, nitrogen and sulfur, 343.
—Determination in organic compounds, micro method, 347.
Fluorone, trihydroxy derivatives of, as reagents for tin an antimony, 273.
Formaldehyde, specific reaction for, based on fluorescence in presence of 2-nitroindanedione-1,3 and concentrated sulfuric acid, 55.

Germanium, colorimetric determination with diphenylcarbazone, 53.
Glass, in situ method method for determination of manganese in, 373.
Glucose, characteristic chromatographic reaction for, using copper citrate reagent, 57.
Gravimetric analysis. A new quantitative method of determining arsenic as the pentasulfide, 319.
—The use of β-hydroxynaphthyl aldehyde in analytical chemistry. Gravimetric and volumetric determination of magnesium, 335.

Hafnium. Quantitative spectrographic determination in zirconium, 15.
—Spectrographic determination of, by arc and spark methods, 67.
—X-ray spectrographic determination of, in zirconium minerals and concentrates, 11.
Halogens. (chlorine, bromine, iodine) Quantitative determination in organic materials, based on combustion by heating in a rapid stream of oxygen without catalyts, 307.
—Mercurimetric method for the determination of, in organic compounds, 353.
Hexamethylenediaminetetracetic acid, see acid.
Hydrogen peroxide. Catalytic decomposition on a platinym electrode, use in potentiometric titration, 31.
—Luminol indicator paper for detection of, 121.

Indicator paper, Luminol, for detection of hydrogen peroxide, 121.
Indicators, one-color acid-base, mixed, 377.
Iron, functional analytical groups for (thioamide), 41.

Khukhiya, Valerian Levanovich, obituary, 123.
Kinetic methods of quantitative analysis. Determination of thiosulfate and copper, 329.
—Theoretical bases of, 323.
Kulberg, Leonid Markovich, (1912-1955), obituary, 187.

Luminol indicator paper, see indicator.

Magnesium, gravimetric and volumetric semimicro determination of, using β-hydroxynaphthyl aldehyde, 335.
Manganese. In situ method for determination in glass, 373.
—Persulfate-cobalt volumetric method of determination in ores and rocks, 169.
Mannosidostreptomycin, see streptomycin.
Medicinal chemistry, Colorimetric determination of the quality of azoribamin, 179.
—The anthron method for the quantitative determination of mannosidostreptomycin, 113.
Mercury, fluorescent detection of, 277.
Metals. Compounds with oxime molecule, effect of structure of oxime molecule on properties, 77.
—Micro determination of carbon in, 45.
Metallurgical chemistry. A persulfate-cobalt volumetric method of determining manganese in ores and rocks, 169.

Metallurgical Chemistry. Chemico-analytical properties of xanthates. Colorimetrical determination of cobalt as the ethylxanthate complex, 283.
—Quantitative spectrographic analysis of hafnium in zirconium, 15.
—Spectral analysis of powders in which the discharge zone by means of an air stream, 251.
—Spectrographic determination of hafnium and zirconium, 67.
Microanalysis. A rapid mass spectrometric micro-method for isotopic analysis of oxygen in water, 241.
—A study of the behavior of ultra small amounts of elements, with particular reference to coprecipitation of radio isotopes, 189.
—Determination of fluorine in organic compounds, 347.
—Micro determination of carbon in metals, 45.
—Micro method for the determination of primary aromatic amines by potentiometric titration with sodium nitrite, 153.
—The use of films of silico-organic compounds in ultra-micro-analysis, 237.
Mineralogical chemistry. A method for the rational analysis of the mineral components of brown coal, 367.
—A persulfate-cobalt volumetric method of determining manganese in ores and rocks, 169.
—Color reactions for beryllium, 259.
—Coprecipitation of thallium, method applicable to granite and other silicate rocks, 197.
—Determination of cesium as cesium bismuth iodide, 107.
—Spectrographic determination of hafnium and zirconium, 67.
—X-ray spectrographic determination of hafnium in zirconium minerals and concentrates, 11.

Naphthalene derivatives. The use of β-hydroxynaphthyl aldehyde in analytical chemistry. Gravimetric and volumetric semi-micro determination of magnesium, 335.
Nickel rubeanate, see rubeanates.

Ores, tin, spectral analysis of, in which the powder is introduced into the discharge zone by means of an air stream, 251.
Oxime molecule, effect of structure on the properties of its compounds with metals, with particular reference to nickel, 77.
Oxygen, in water, rapid mass spectrometric micro-method for isotopic analysis of, 241.

Petroleum chemistry, potentiometric methods of investigating high molecular weight compounds of petroleum, determination of acidity, 299.
Phenols, acidimetric determination of, in basic solvents, 157.
Platinum, polarographic determination on solid electrodes, 289.
Polarographic analysis. New complexones, 117.
—Observations made by K. Mitska and A.A. Vlchek regarding the article "Diffusion of electrolytes and the polarographic method," 181.
—Polarographic determination of ethyl nitrate and ethyl nitrite in aqueous solutions, 293.
—Polarographic determination of platinum on solid electrodes, 289.
—Polarographic determination of saccharin, 163.
Potassium picrate, coprecipitation with cesium, 311.
Potentiometric analysis. A micro method for the determination of primary aromatic amines by potentiometric titration with sodium nitrite, 153.
—Potentiometric determination of Cr_2O^{2-} ions and strong acids when both are present simultaneously, 37.
—Potentiometric method of investigating high molecular weight compounds of petroleum, determination of acidity, 299.
—Potentiometric titration using the catalytic decomposition of hydrogen peroxide on a platinum electrode, 31.
Powders, spectral analysis of, in which the powders are introduced into the discharge zone by means of an air stream, 251.

Qualitative analysis. A specific reaction for formaldehyde, 55.
—A specific reaction for vanadium, 177.
—Color reactions for beryllium, 259.
—Functional analytical groups for iron and bismuth, 41.
—Luminol indicator paper for hydrogen peroxide detection, 121.
—The use of chloramines in qualitative analysis, 375.
—Quantitative determination of chlorine, bromine and iodine in organic materials, 307.
—The theoretical bases of kinetic methods of quantitative analysis, 323.
Quinoline compounds. Precipitation of quadrivalent vanadium with 5,7-dibromo- and 5,7-diiodo-8-hydroxyquinoline, 49.

Radiochemical analysis. A method for the determination of radioactive carbon in organic compounds, 359.
—A rapid mass spectrometric micro-method for isotopic analysis of oxygen in water, 241.
—A study of the behavior of ultra small amounts of elements, with particular reference to coprecipitation of radio isotopes, 189.
—Coprecipitation of cesium with potassium picrate, 311.
—Coprecipitation of thallium with mercury as the tetrathiocyanate diamino chromite, 209.
—Organic coprecipitants. Coprecipitation of thallium, 197.
—Organic coprecipitants. Coprecipitation of tungsten with organic coprecipitants, 25.
—The use of surface active agents for prevention of coprecipitation of ions with sulfide precipitates, 203.

Refractometric analysis. Refractometric analysis of ternary systems, 1.
Rhenium, analytical chemistry of, with particular reference to complex formation with organic compounds, 215.
Rubeanates, of copper, nickel and cobalt, solubility products of, 97.
Rusanov, Anatoli Konstantinovich, fiftieth birthday of, 321.

Saccharin, polarographic determination of, 163.
Shemyakin, Fedor Mikhailovich, 50th birthday and 25th year of teaching activity, 381.
Silicon organic compounds, the use of films of, in ultra-micro-analysis, 237.
Silver ferrocyanide, amperometric study of the precipitation reactions of, oxidation reaction 231.
Solubility products, of the rubeanates of copper, nickel and cobalt, 97.
Spectrographic analysis. A cell for quantitative spectral analysis and an apparatus for measuring the thickness and the wedge of cells, 247.
—A design for an A.C. arc with magnetic stabilization for spectral analysis, 315.
—A rapid mass spectrometric micro-method for isotopic analysis of oxygen in water, 241.
—Determination of the main components of clay, spectrographically, 147.
—Quantitative spectrographic analysis of hafnium in zirconium, 15.
—Spectral analysis of powders in which the powders are introduced into the discharge zone by means of an air stream, 251.
—Spectrographic determination of hafnium and zirconium, 67.
—The use of (W_1W_2)-diagrams for x-ray spectrographic analysis, 173.
—X-ray spectrographic determination of hafnium in zirconium minerals and concentrates, 11.
Streptomycin, mannosido, anthron method for the quantitative determination of, 113.
Sulfide precipitates, use of surface active agents for prevention of coprecipitation of ions with, 203.
Surface active agents, use for prevention of coprecipitation of ions with sulfide precipitates, 203.
Systems, ternary, refractometric analysis of, by dispersometric and extraction methods, 1.

Thallium. Coprecipitation using radio isotopes, 197.
—Coprecipitation with mercury as the tetrathiocyanate diamino chromite, 209.
—Fluorescent detection of, 277.
—Prevention of coprecipitation with arsenic sulfide, by use of surface active agents, 203.
Thiosulfate, oxidation by trivalent iron, kinetic equation for determination of, influence of copper salts, 329.
Tin. Detection and colorimetric determination with trihydroxyfluorone derivatives, 273.
—Ores, see ores.
Tungsten, coprecipitation with organic coprecipitants, (Methyl Violet and tannin), 25.

Uranyl ion, complex compounds of, which are of importance in analytical chemistry, 223.

Vanadium. Colorimetric determination by a catalytic reaction, based on oxidation of aniline by chlorate in the presence of vanadium activated by oxine, 21.
—Quadrivalent, precipitation with 5,7-dibromo- and 5,7-diiodo-8-hydroxyquinoline, 49.
—Specific reaction for, based on reduction of sexivalent molybdenum to molybdenum blue, 177.
Volumetric analysis. Acidimetric determination of phenols, 157.
—A persulfate-cobalt volumetric method of determining manganese in ores and rocks, 169.
—A volumetric method for the determination of cobalt with dimethylglyoxime, 91.
—Quantitative characteristics which determine the possibility of using complex compounds in volumetric analysis, 85.
—The use of β-hydroxynaphthyl aldehyde in analytical chemistry. Gravimetric and volumetric semi-micro determination of magnesium, 335.

Volumetric analysis. Volumetric determination of beryllium. Hydrolysis of beryllium sulfate by means of a KI–KIO_3 mixture, 269.

Xanthates, chemico-analytical properties of. Colorimetric determination of cobalt as the ethylxanthate complex, 283.

Zirconium. Minerals and concentrates, x-ray spectrographic determination of hafnium in, 11.
–Quantitative spectrographic determination of hafnium in, 15.
–Spectrographic determination of, 67.
